Meet the Dental Team

Mr Kirk Young, BDS.,

MFGDP

Mrs Sheena Young, BDS.

Mrs Jill Butler, BchD

MFGDP

Miss Stephanie Burton,

EBDSA

Miss Kerry Deller, EBDSA

Mrs Debbie Hall

Mrs Karen Jefferies, EBDSA

Mrs Sam Mileham

Miss Sally Wright, EBDSA

Practice Hours

Monday – Friday

9 – 5.15pm

In Case of an Emergency

Our practice operates an emergency service please call 0845 0568298

We accept all major credit cards.

Young's Dental Practice

As well as reaching the top ten for the 'Innovative Practice of the Year Award 2009' we have won 'The Preventive Practice of the Year Award 2009'. All team members are thrilled to achieve national recognition for our commitment to improving the dental health of our local community. In partnership with Oral-B, we have been recognised as THE UK practice with the strongest, best established and well thought out preventative ethos, whether it be NHS, private or mixed. As a team, we have shown to successfully communicate the oral health message to our patients, we are working together to raise oral health standards and regard prevention as our number one priority above all else. As a practice we will be exposed as an example of excellence to dental practitioners up and down the country. We have been judged by an independent panel of judges including members of the Preventive Dentistry editorial board who compiled a short-list of four finalists from all entries received, and they took the final say after an exhaustive study of the candidates' credentials. As a fully minimally invasive practice we can offer you a cost effective solution for your dental care. We take a holistic approach to dentistry-looking at each patient as an individual. We have looked at all aspects of our work practice to try to reduce the biological cost to our clients. Rather than just 'drill and fill', we monitor each client deemed at risk from decay and gum disease using a traffic light coding system on the computer which alerts the dentist when such client's file is opened. We then look for the reason for decay i.e. fizzy drinks, mints, poor oral hygiene etc and give counselling and instruction to prevent further decay. A new fluoride varnish is now being used on patients at risk from decay to help prevent invasive treatment. If treatment is unavoidable we then follow a **MINIMAL INTERVENTION DENTISTRY (MID) PATHWAY** by using air abrasion, mini/low vibration burs, healozone and keep preparation to a minimum-all of which keep tooth destruction and cost to a minimum. As we are pioneers of MID and extremely enthusiastic we are continually asked to lecture all over the country to other dentists on this subject and dental companies regularly visit the practice for our advice.

Membership Scheme

For those on the Payment Plan you will be aware that your monthly payment includes your check ups and scale and polish, all necessary x-rays and 20% discount on our fees as well as emergency cover and dental insurance. The Scheme DOES NOT give you those same benefits BUT it does cover registration with the practice AND it automatically includes the emergency cover and dental insurance. In summary:

- Offering the peace of mind from knowing you are registered with a dentist in this practice.
- Receiving prompt appointments.
- Having a membership card with helpline numbers for dental emergencies at home or abroad.
- Insurance cover for dental trauma and emergency dental treatment when away from home or abroad.

AS A GOOD WILL GESTURE TO OUR LOYAL CLIENTS THERE WILL BE NO FEE INCREASE ON ANY OF OUR MEMBERSHIP SCHEMES IN 2010 AND WE ARE NOW OFFERING STUDENT RATES.

As your dental care providers we have unfortunately seen quite a few cases where our clients have had accidents to their mouth requiring extensive dental work which can be costly and may occur to the young and old. Being insured both here and abroad is, we feel, essential. Although we do recommend that our clients register on one of our practice membership schemes, it has come to our attention that some of you have your own health insurance so it is more convenient to pay fee per item without membership-these schemes will not offer the same level of dental cover as our own though. As mentioned in other newsletters we are constantly trying to improve the level of your care, and overleaf we have highlighted some of these benefits and features. If you or a relative have a problem with oral care, one of our team can advise you on some steps that can be taken to improve it. For example, if your child is not cleaning their teeth too well and you think that it might be beneficial for someone else to get the message across, we encourage you to ring the practice WE DO NOT CHARGE for this service - it is all part of the package we have put together.

[The Modern Approach To Dentistry With Years Of Clinical Experience](#)

[FILL NO DRILL](#)

[AQUACUT QUATTRO 4](#) Each surgery is equipped with the latest air abrasion technology. This enables us to perform fast and effective cleaning to give a much quicker and more accurate diagnosis of your dental condition. Unlike conventional drilling of the tooth the **Aquacut** is not in direct contact and there is no vibration, heat generation, drill noise or smell. Air abrasion in some cases can remove the need for local anaesthesia. A short video demonstrating a simple white filling repair is now available to view on our website along with more information. [PAINLESS TOOTH PREPARATION.](#) [SYLC](#) desensitiser is now being used, which is **revolutionary** in preventative care as it not only provides immediate desensitisation and tooth whitening but **restores natural dentine and tooth enamel.**

[Loupes](#) - magnifying glasses are used for all examinations to assist us in identifying early decay or areas which may require further investigation.

[Intra-oral cameras](#) - provide additional magnification and are very helpful in showing you areas requiring closer attention or cavities requiring treatment. They can also be used during treatment – involving you at each stage.

[CarieScan & Diagnodent](#) - exciting hand-held computer devices, which detect very early decay and gives us a choice of treatment options. We can and do use x-rays but sometimes the area is so small as not to appear on an x-ray but still needs treatment. If the decay is very early we can give you some oral care advice.

[Soprolife - Changing dentistry forever!](#) We feel very lucky to have this equipment along with only 4 other practices in the country. SOPROLIFE enables us to see what was once invisible to our eyes. This has a magnification of x 120!! It is able to detect tooth decay at different stages of its development thus allowing the most adequate treatment option-MID! It differentiates healthy from infected tissue in order to excavate only the tissue which is diseased. This is leading the way in diagnosis and treatment of dental caries. Less X-ray exposure for patients-although sometimes still required alongside MID options.

[Healozone](#) - Ozone bathes infected areas of a tooth with no sensation eliminating decay producing bacteria.

[The Wand](#) – A computer delivery system for local anaesthetic – controlled for ease & comfort.

[Holistic Approach-Dentistry & Physiotherapy](#)

We really feel that a holistic approach to patient care is of uppermost importance. If you suffer from tooth grinding/headache/back/neck/facial pain, these symptoms could be helped by a combined study of your problems with your dentist & physiotherapist. A maintenance programme will be provided to reduce such problems. We can now offer these services under the one roof & hope to expand them in the future.

[TOOTH WHITENING](#)

Now available again - can be used in selective cases where it would be very destructive to drill a healthy tooth for placement of a crown just to get a whiter appearance. It is a very simple process, which can whiten teeth up by a good couple of shades. An impression is required for the construction of your take home trays and the process takes only a few weeks if used as advised. The treatment costs £295 for upper & lower. We also offer vouchers for whitening-why not treat a friend or family member by part or full payment – a great gift!

For information about our practice and treatments available please visit our website: www.youngsdentalpractice.co.uk or alternatively contact our team via the phone number shown or email sam/debbie/sal@youngsdentalpractice.co.uk
